

# R&D Snapshot

## Code of Practice for On-farm Biogas Production and Use (Piggeries)

**Investigator:** Prime Consulting

**Purpose:**

- A previous APL project identified confusing and onerous information with regards to Biogas regulations across different States
- In response, APL has developed a risk based Code of Practice for On-farm Biogas Production and Use (Piggeries) (CoP Biogas).

**Take home messages:**

- The CoP Biogas aims to assist producers and regulators to take a risk based approach to Biogas plants on Australian piggeries
- Primarily focuses on covered anaerobic ponds
- Draft CoP Biogas now available on APL website for consultation and feedback is encouraged
- The consultation period will be open till end September and a number of consultation workshops to be held in September in Brisbane, Sydney, Melbourne, Adelaide and Perth.

**Additional information:**
